OBJECTIVE

Motivated Computer Science student with experience in developing ML-based applications and AI chatbots. Interested in exploring Generative AI, LLM integration, Prompt Engineering, and RAG-based systems to build intelligent, real-world AI applications.

EDUCATION

- **Diploma in Computer Engineering**
College Name - AISSMS College of Polytechnic
Percentage - 77.43%
Year of Completion - 2023
 - **B.Tech in Computer Science**
College Name - Deccan Education Society's Pune University
Current CGPA - 8.02 **Last SGPA** - 8.9
Expected to be Completed in - 2026
-

WORK EXPERIENCE

- Industrial Training in Software Development** **4th July 2022 to 10th August 2022**
Organisation Name - Globeminds Technology PVT.LTD., Pune
- Gained hands-on experience with Java programming and advanced topics such as JDBC and JSP.
 - Strengthened skills in Java Programming through practical application in projects.
-

SKILLS

Programming Languages - C++ (Intermediate), Java(Intermediate), Python(Intermediate)
AI/ML - ML Basics, NLP Concepts, Chatbot Development, AI API Integration
Web Development - HTML, CSS, JavaScript
Database Management - MySQL, MongoDB
Core Concepts - Object-Oriented Programming (OOP), Data Structures
Tools & Technologies - Visual Studio Code, Git & GitHub

PROJECTS

- **Project 1** - Developed Air Quality Monitoring System Using IOT and Machine Learning along with 3 other group members.
Publication:
Paper Title: Air Quality Monitoring System Using IoT and Machine Learning
Journal: International Research Journal of Modernization in Engineering Technology and Science (IRJMETS).
Paper ID: IRJMETS503000032191
Date of Publication: 24/03/2023
Link: [Air Quality Monitoring System](#)

- **Project 2** - Smart Budget - Based Travel Planner Website with ML Integration (Roamify).

Tech Stack - HTML, CSS, JavaScript, Python, Node.js, Express.js, MongoDB, OpenAI API.

Description -

- Built a web app for budget-based travel planning across Maharashtra, with future scalability to pan-India.
 - Integrated a chatbot using NLP and OpenAI APIs for personalized itinerary generation.
 - Designed an Explore page with city-wise tourist info and filters, plus an expense tracker for trip budgeting.
-

CERTIFICATIONS

1. **Internship Certificate** - Industrial Training in Software Development
 2. **Group Project Competitions** - Technothon 2023 Participation, IdeaGo 2023 Participation
 3. **Paper Publication Certificate** - Air Quality Monitoring System using IOT and ML on IRJMETs
-

ADDITIONAL INFORMATION

- **Languages** - English, Hindi, Marathi
